

W Series Heatsinks

For TO-220, TO-247, and TO-264 devices

The unique design (patent pending) of the W Series heat sinks combines a tin plated, solderable, integral spring clip with an extruded aluminum heat sink body for an all-in-one solution to through-hole mounting of TO-220, TO-247, and TO-264 packages. These self-aligning heat sinks feature solderable feet and an integrated clip with 13.2 (lbf) of force on the center of the device to enhance thermal performance.

FEATURES

- Reduced Assembly Cost: spring clip and auto-align feature makes fasteners and fixtures obsolete, along with stray metal filings from tapped holes
- Maximum Repeatability: clamping force of the spring clip is not degraded by repeated loading and unloading
- Maximum Heat Transfer per Unit Space: maximum surface area per unit volume and consistent mounting force reduces thermal resistance
- Maximum Resistance to Shock and Vibration: light weight, resilient spring clip locks the component in place and is highly resistant to shock and vibration
- Maximum Reliability: helps prevent short circuits by eliminating metal particles from thread tapping
- RoHS Compliant

*Natural convection at 10W heat dissipation

CHARACTERISTICS

Heat Sink	Aluminum alloy 6063-T5 or equivalent.
Spring Clip	Music wire, per ASTM A228
Pin	Solderable 100% tin over copper strike
Interface thermal resistance	for improvement, use thermal joint compound or 0.005 Grafoil (TGon 800 by Laird)
Interface electrical isolation	Sil-Pad 900S by Bergquist or equivalent
Mounting	Vertical thru-hole mount
Clip Force	13.2 lbf.
